

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering Bannari Amman Institute of Technology CGPA: 7.90 (Up to 8th Semester)	Nov 2022 – April 2026 Sathyamangalam,India
Higher Secondary Certificate (HSC) Government Higher Secondary School, Kaliannanpudur Percentage: 87.0%	Apr 2020 - Mar 2022 TamilNadu,India
Secondary School Leaving Certificate (SSLC) Government Higher Secondary School, Kaliannanpudur Percentage: 88.0%	Jan 2015 - Mar 2020 TamilNadu,India

SKILLS SUMMARY

- **Languages:** Python, Java, SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks:** Flask, Streamlit
- **Tools:** Visual Studio Code, MySQL, Git & GitHub, Docker Hub, Postman
- **Core Subjects:** Data Structures & Algorithms, OOPS, DBMS, OS, CN
- **Soft Skills:** Problem Solving, Team Collaboration, Quick Learner, Adaptability, Critical Thinking

PROJECTS

Text-to-Video AI Generator LINK	Sept 25 – Oct 2025
◦ Developed an AI-powered application that converts text topics into narrated short videos. ◦ Integrated OpenAI/Groq for script generation, Edge TTS for narration, and Whisper for captions. ◦ Automated video assembly using MoviePy and ImageMagick, producing complete rendered videos ◦ Built an interactive Streamlit interface allowing users to input and download generated videos.	
Deep Learning-Based Image & Video Colorizer LINK	Dec 24 – Mar 2025
◦ Developed an AI-based tool to colorize black-and-white images and videos using deep learning. ◦ Used pre-trained CNN models to predict color information (LAB color space). ◦ Built an interactive Streamlit web app to upload and colorize media in real time. ◦ Handled frame-by-frame video processing and smooth color transitions using OpenCV.	
AI Powered Video Content Moderation System LINK	Jan 26- Feb 2026
◦ Developed an AI-powered video compliance platform using FastAPI, React, Gemini AI, and FFmpeg for automated content moderation. ◦ Implemented video editing features such as blur, pixelation, object replacement, and audio censorship using AI-driven workflows. ◦ Integrated Gemini AI for multimodal video and audio analysis to detect policy violations and recommend intelligent edits. ◦ Built an end-to-end local video processing pipeline with Python, FFmpeg, and AI models, enabling automated compliance and content remediation.	

CERTIFICATES

Java Programming Fundamentals - Infosys Wingspan CERTIFICATE	Dec 2022
◦ Gained a solid understanding of Java programming principles, including object-oriented concepts, exception handling, and data structures.	
Create Your First Python Program - UST via Coursera CERTIFICATE	Nov 2023
◦ Learned the basics of Python programming, including syntax, variables, control structures, and simple project implementation.	
Learn Python - CodeChef CERTIFICATE	Sep 2023
◦ Strengthened Python proficiency by solving practical challenges, focusing on problem-solving and competitive programming techniques.	

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025 – Cleared the College Internal Selection Round with the project **AI Powered Video Content Moderation System**.
- Solved **250+ DSA problems** on LeetCode and GeeksforGeeks.
